

Summer Internship Program

The Mission

The TAG-Ed Summer Internship Program provides real-world experiences for high-achieving students with strong STEM aptitude. We place students in Georgia companies who are interested in investing in STEM talent and growing our future technology workforce.

- Internships are 5 consecutive weeks, 20-30 hours per week
- Take place from June to August.
- We have placed more than 650 students in paid STEM internships
- Our goal is to place 200 students in 2016!

The Process

Hosting a summer intern is easy! The TAG-Ed Summer Internship Program boasts a turnkey process that provides a beneficial internship experience for both the student and the company.

- 1** TAG-Ed works with you to define a *valuable* project for your company.
- 2** TAG-Ed sends 2-4 pre-screened candidates for you to interview via phone, Skype, or in-person.
- 3** Once you have selected your intern, TAG-Ed notifies the student and ensures they complete their necessary paper work, connects them to their mentors, and provides a student/mentor orientation on how to make the most of the internship experience.
- 4** TAG-Ed bills your company; \$1,000 for the student stipend (standard 5 week internship) and \$250 for the program administration. After satisfactory completion, we send your intern his/her stipend!

The Final Remarks

Hosting an intern is easy and makes a huge impact. Your company gets a firsthand look at the next generation of employees, you enable a student to gain much needed experience to pursue a career in a STEM field, and ultimately help bridge the gap in Georgia's STEM workforce.

Summer Internship Program

The Feedback

“ Outstanding - teams she worked with consistently praised [her] high caliber of work, professionalism, and ability to be uninhibited to jump in and do work. [She] even presented to senior personnel without missing a beat - she impressed them.

- Arthur Tsiropoulos, Verizon Wireless
